

We Make Giving **Easy!**

Our Mission is very simple.

We strive to develop products that help our clients reach their goals, allowing them to continually enhance and enrich the lives of others through outreach and ministry. We've seen success in the churches, nonprofits and foundations we've helped as a testament to this mission.

Our program is designed to increase donations by providing electronic avenues for donors to work with. Our solutions include online giving, text-to-give, mobile giving and donation kiosks.

Whether you are a 501c3 non-profit, a faith-based charitable organization or a school, our RuCharitable program will help you enhance and streamline electronic giving with reliable, convenient and secure technologies. Our robust donor reports provide a daily recap, donation detail report by date range, total transaction report by date range, active recurring donations, year-to-date report and registration report.

Even when running a lean organization, it is still vital to update your technologies, especially when it affects your relationship with the donors who support your mission. Through RuCharitable, we hope to help many more charitable organizations grow and thrive.
